DACO-Diacs

詳細產品規格--請點擊www.100y.com.tw

FEATURES:

The three layer, two terminal, axial lead, hermetically sealed diac is redesigned specifically for triggering thyristors. They demonstrate low breakover current at breakover symmetry is within three volts (DB3, DC34, DB4, DB6) or four volts (DB6). These diacs are intended for use in thyristor phase control, circuits for lamp dimming, universal motor speed control, and heat control. (DB3, DC34, DB4, DB6) are bi-directional triggered diodes designed to cooperate in conjunction with Triacs and SCR's
