Building on the success of the standard HR30 connector, Hirose now offers a version that allows for a custom overmold to be applied to the connector. This gives the design engineer the opportunity to design the overmold that suits the application. Hirose supplies the un-overmolded connectors and it is up to the design engineer to have the overmold applied to the connector.

1. Small size

Short in length when fully terminated and mated.

2. Water and dust protected

IP67 protection rating: Complete protection against dust penetration and against water penetration when submerged 1 meter deep for half hour when mated with the corresponding connector or protective cap.

3. Simple pull lock release

Built-in lock/release mechanism securely locks mated connectors while allowing quick disconnection by simply pulling on the plug's release collar. Molded-in grooves prevent finger slippage when pulled. The round configuration of the collar allows easy side-by-side panel mounting and will not snag on objects when the cable is pulled-out.

4. Light weight, corrosion resistant

Glass reinforced thermoplastic compounds and noncorrosive components are used in all assemblies.

5. Contact protection and self- alignment

Multiple polarizing keys protect the contacts from missalignment or attempted insertion of the wrong connector, while assuring correct mating between the corresponding connectors.

6. Visual alignment indicators

Permanent alignment indicators in a contrasting color on all connectors aid in correct alignment and engagement.

Applications

Test and measuring equipment, portable devices, instrumentation, industrial devices, recreational equipment, I/O applications and other applications requiring use of lightweight, corrosion resistant quick mate-release cable connections.

Ordering Information & Product Specifications

| 1 Series Name | :HR30 | 5 Number of contacts: | 3, 6, 10 and 12 | | |
|------------------|------------------------------------|-----------------------|---------------------------------|--|--|
| 2 Shell Size | :Outside diameter/plug mating side | 6 Contact type | S: Female contact | | |
| | P: Plug | | P: Male contact | | |
| 3 Connector type | pe R: Receptacle J: Jack | 7 Contact wiring type | Blank: Solder C : Crimping | | |
| 4 Variation | Blank: Standard | | D : Through hole | | |
| Variation | A: Fine wire B: Overmold | 8 Plating | (71): Gold plated (except caps) | | |

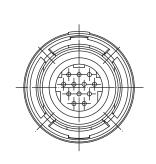

| Characteristics | Specification | Conditions |
|---------------------------------|--|---|
| | 5m ohms max. (3 pos) | |
| Contact resistance | 15m ohms max. (Solder type: 6, 10, and 12 pos.) | 1A DC |
| | 30m ohms max. (Through hole type: 6 and 12 pos.) | |
| 2. Insulation resistance | 1000M ohms min | 100V DC |
| Withstanding voltage | No flashover or insulation breakdown | 300V AC/one minute |
| 4. Vibration | No Classical discontinuity of 40 up or mars | Frequency: 10 to 55 Hz, single amplitude of 0.75mm |
| 4. Vibration | No Electrical discontinuity of 10 µs or more | 1 cycle = 5min, 10 cycles in each of the three directions |
| | Contact resistance 10m ohms min. (3 pos.) | |
| 5. Durability (mating/unmating) | Contact resistance 30m ohms min. (Solder type: 6, 10, and 12 pos.) | 1000 cycles |
| | Contact resistance 100m ohms min. (through hole type: 6 and 12 pos.) | |
| 6. Temperature cycle | Insulation resistance 100M ohms min. | (-5°C: 30 minutes Room temperature: 10 to 15 minutes +85°C: 30 minutes Room temperature: 10 to 15 minutes) for 5 cycles |
| | Insulation resistance | |
| 7. Humidity resistance | 10M ohms min. (when humidity is high) | 96 hours at room temperature of 40 ohms and humidity of 90% to 95% |
| | 100M ohms min. (when dry) | |
| 8. Waterproof performance | | While mated with corresponding or protective cap submerged at depth of 1 |
| 9. Dust protection | No penetration inside | meter for 1/2 hour |

8R-12SD

- Notes 1. The receptacle through hole configuration depicts a view from the mating side of the connector.
 - 2. The recommended board maximum thickness: 1.2mm
 - 3. Tolerance of +0.03 mm is recommended for the plated through hole location. Tolerance of +0.02mm is recommended for the plated through hole diameter.

| | Α | В | С | D | Panel Thickness |
|------------|------|------|-------|------|-----------------|
| 3, 6 pos. | 1.25 | 6.45 | 8.05 | 3.95 | 0.7 - 2 |
| 10, 12 pos | 1.35 | 9.25 | 11.05 | 5.45 | 0.7 - 3 |

1. The contact configuration depicts a view from the wiring side. Notes

2. Mounting to the panel is accomplished by tightening the hexagonal nut fron the rear side of the panel.
