

N360 Series RECTANGULAR CONNECTORS

FEATURES

- Many applications
Various connectors are available for connection by means of soldering, crimping, PC board mounting, and insulation displacement connection (IDC).
- Small size for high-density mounting
The connectors are small with a contact and terminal pitch of 2.54 mm (0.100 in.) between pins and between rows and are thus well suited for high-density mounting.
- Sturdy shell guide
Sturdy shell guides are used to prevent mismating and to protect the pins.
