MASTER TL5 HE 35W/ 840 ISI

Product family description

Low-pressure mercury discharge lamps with a tubular 16 mm envelope

Product Features

- 40% thinner than TL-D lamps
- High lamp efficacies up to 104 lm/W
- Highly efficient 3-band fluorescent coating in combination with precoating
- Specifically designed for operation with electronic gear and well suited for dimming
- Maximum light output reached at approx. 35 °C in freeburning position if an electronic ballast without additional electrode heating is used
- Can be ignited from -15 to +50 °C

Product Benefits

- Allows system miniaturisation and maximum luminaire design freedom
- Lamp lengths enable easy fitting into ceiling module systems
- Offers higher efficiencies and energy savings compared with TL-D lamps
- Virtually constant lumen level with excellent lumen maintenance
- Good colour rendering

Environment

• Best environmental choice because of highest energy efficiency available for fluorescent lighting. Lowest CO2 emission compared to any other comparable lightsource (40% less than a TL-D standard lamp, 26% less than TL-D 800). Products having the "Green Flagship" logo contain the lowest mercury content in the industry and are 100% lead free. Less material, packaging, weight, transport and recycling volume due to smallest product dimensions (only 16 mm diameter, 40% less compared with TL-D lamps)

- This product range is RoHS compliant
- This product range is covered by WEEE

Application

Ideally suited for recessed, surface-mounted and suspended luminaires in applications like offices, shops, schools, public buildings and industry, wherever highquality, energy-effective lighting is required

schoo	nded luminaires in applications like offices, shops, ols, public buildings and industry, wherever high- y, energy-effective lighting is required
