Solid-state contactors General use

■ Description

Solid-state contactors (SSC) are required in cases where contacts must have long life because contacts are frequently made and broken, and where contactor noise must be eliminated. Single-and 3-pole solid-state contactors incorporate thyristors as making and breaking elements in the main circuit.

■ Features

- Operation indicator provided

An operation indicator LED (red) is provided as a standard feature for all models, so you can easily check whether a control voltage is applied to the SSC.

- Long service life, optimum for highly frequent switching

The solid-state contactor utilizes high-performance semiconductor switch elements to include the functions and features of conventional magnetic contactors. The SSC, featuring long life, low-noise, and high-speed response, is suitable for highly frequent switching of various types of loads, such as motors and heaters.

Note: * The values are the maximum ratings of type with cooling fin that apply at an ambient temperature not exceeding 40°C.

- **Built-in surge suppressor**
Varistors and C-R circuits are included so that surge voltage due to SSC switching and lightning can be suppressed to protect the control and main circuits.

- **AC and DC operation**
The AC and DC operated type SSCs are available, either of which can be selected as required.

- **SSC with zero-cross switching function**
The SSC is also available with a zero-cross switching function to enable load current switching at the point where the line voltage is near zero to suppress excessive inrush current in the load circuit.

- **Built-in auxiliary contact**
An auxiliary contact module using semiconductor switches or relay contacts is included. Therefore an auxiliary output signal can easily be obtained without using a separate auxiliary devices.

*2 Type SS08□ is shipped with a cooling fin fitted to the main body even if /F is not suffixed to the type number.

*3 Suffix code applicable only to type SS80□ and type SS120□. Fan rated operating voltage: 100~120V AC, 50/60Hz.

*4 Suffix code applicable only to type SS80□ and type SS120□. Fan rated operating voltage: 200~240V AC, 50/60Hz.

*5 Suffix code applicable only to type SS80□ and type SS120□. Fan rated operating voltage: 24V DC.
