STW13009

High voltage fast-switching NPN power transistor

Features

- Low spread of dynamic parameters
- High voltage capability
- Minimum lot-to-lot spread for reliable operation
- Very high switching speed

Application

■ Switch mode power supplies

Description

The device is manufactured using high voltage multi-epitaxial planar technology for high switching speeds and medium voltage capability. It uses a Hollow emitter structure to enhance switching speeds.

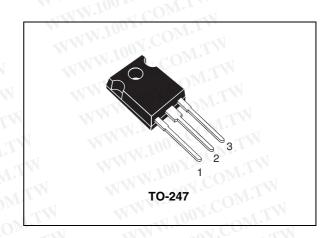

Figure 1. Internal schematic diagram

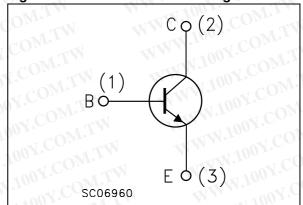

Table 1. Device summary

Order code	Marking ⁽¹⁾	Package	Packaging
STW13009	W13009 L	TO-247	CON.TV
510013009	W13009 H	10-247	Tube

Product is pre-selected in DC current gain (group L and group H). STMicroelectronics reserves the right to ship either groups according to production availability. Please contact your nearest STMicroelectronics sales office for delivery details.

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect. The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. WWW.100Y.COM ECOPACK specifications are available at: www.st.com WWW.100Y.COM.TW WWW.100Y.C
