# STF40NF06

### N-channel 60V - 0.024Ω - 23A - TO-220FP STripFET™ II Power MOSFET

### **General features**

| Туре      | V <sub>DSS</sub> | R <sub>DS(on)</sub> | ID  |
|-----------|------------------|---------------------|-----|
| STF40NF06 | 60V              | <0.028Ω             | 23A |

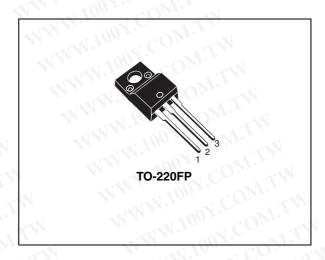

- Exceptional dv/dt capability
- Low gate charge at 100°C
- Application oriented characterization
- 100% avalanche tested

### Description

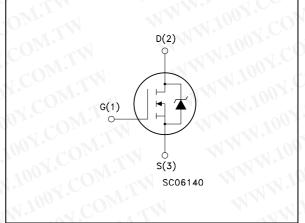

This MOSFET is the latest development of STMicroelectronics unique "Single Feature Size™" strip-based process. The resulting transistor shows extremely high packing density for low on-resistance, rugged avalance characteristics and less critical alignment steps therefore a remarkable manufacturing reproducibility.

### Applications

Switching application

### Internal schematic diagram

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect . The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com WWW.100Y.COM
