STP5NK100Z, STF5NK100Z STW5NK100Z

N-channel 1000 V, 2.7 Ω, 3.5 A, TO-220, TO-220FP, TO-247 SuperMESH3[™] Power MOSFET

Features

| Туре | V _{DSS} (@T _{JMAX}) | R _{DS(on)} max | ID |
|------------|---|-------------------------|-------|
| STF5NK100Z | 1000 V | < 3.7 Ω | 3.5 A |
| STP5NK100Z | 1000 V | < 3.7 Ω | 3.5 A |
| STW5NK100Z | 1000 V | < 3.7 Ω | 3.5 A |

- Extremely high dv/dt capability
- 100% avalanche tested
- Gate charge minimized
- Very low intrinsic capacitances
- Very good manufacturing repeatibility

Applications

Switching application

Description

The new SuperMESH[™] series of Power MOSFETS is the result of further design improvements on ST's well-established stripbased PowerMESH[™] layout. In addition to significantly lower on-resistance, the device offers superior dv/dt capability to ensure optimal performance even in the most demanding applications. The SuperMESH[™] devices further complement an already broad range of innovative high voltage MOSFETs, which includes the revolutionary MDmesh[™] products.

The built-in back-to-back Zener diodes have specifically been designed to enhance not only the device's ESD capability, but also to make them safely absorb possible voltage transients that may occasionally be applied from gate to source. In this respect the Zener voltage is appropriate to achieve an efficient and cost-effective intervention to protect the device's integrity. These integrated Zener diodes thus avoid the usage of external components.
