

TOSHIBA CMOS DIGITAL INTEGRATED CIRCUIT SILICON MONOLITHIC

TC74HC4520AP, TC74HC4520AF**DUAL 4 - BIT BINARY COUNTER**

The TC74HC4520A is high speed CMOS DUAL BCD / 4 - BIT BINARY COUNTER fabricated with silicon gate C²MOS technology.

It achieves the high speed operation similar to equivalent LSTTL while maintaining the CMOS low power dissipation.

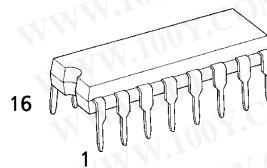

Since it contains two independent counter circuits in one package, counting or frequency division of eight binary bits can be achieved with one device. The counter is reset to "0" (Q0~Q3 low) by setting the CLR input high regardless of the other inputs.

Counting occurs on the positive going (rising edge) transition of CK if CE is high or the negative going (falling edge) transition of CK if CE is low.

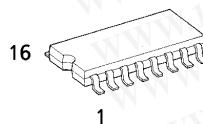

All inputs are equipped with protection circuits against static discharge or transient excess voltage.

FEATURES :

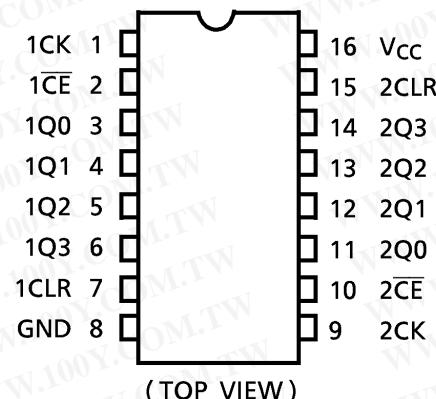

- High Speed..... f_{MAX} = 55MHz(typ.) at V_{CC} = 5V
- Low Power Dissipation..... I_{CC} = 4μA(Max.) at Ta = 25°C
- High Noise Immunity..... V_{NIH} = V_{NIL} = 28% V_{CC} (Min.)
- Output Drive Capability..... 10 LSTTL Loads
- Symmetrical Output Impedance..... | I_{OH} | = I_{OL} = 4mA(Min.)
- Balanced Propagation Delays..... t_{pLH} ≈ t_{pHL}
- Wide Operating Voltage Range..... V_{CC} (opr.) = 2V~6V
- Pin and Function Compatible with TC4520B

- TOSHIBA is continually working to improve the quality and the reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to observe standards of safety, and to avoid situations in which a malfunction or failure of a TOSHIBA product could cause loss of human life, bodily injury or damage to property. In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent products specifications. Also, please keep in mind the precautions and conditions set forth in the TOSHIBA Semiconductor Reliability Handbook.
