description

The TLC04/MF4A-50 and TLC14/MF4A-100 are monolithic Butterworth low-pass switched-capacitor filters. Each is designed as a low-cost, easy-to-use device providing accurate fourth-order low-pass filter functions in circuit design configurations.

Each filter features cutoff frequency stability that is dependent only on the external-clock frequency stability. The cutoff frequency is clock tunable and has a clock-to-cutoff frequency ratio of 50:1 with less than $\pm 0.8\%$ error for the TLC04/MF4A-50 and a clock-to-cutoff frequency ratio of 100:1 with less than $\pm 1\%$ error for the TLC14/MF4A-100. The input clock features self-clocking or TTL- or CMOS-compatible options in conjunction with the level shift (LS) terminal.

The TLC04C/MF4A-50C and TLC14C/MF4A-100C are characterized for operation from 0°C to 70°C. The TLC04I/MF4A-50I and TLC14I/MF4A-100I are characterized for operation from -40°C to 85°C. The TLC04M/MF4A-50M and TLC14M/MF4A-100M are characterized over the full military temperature range of -55°C to 125°C.

AVAILABLE OPTIONS

T _A	CLOCK-TO-CUTOFF FREQUENCY RATIO	PACKAGE	
		SMALL OUTLINE (D)	PLASTIC DIP (P)
0°C to 70°C	50:1 100:1	TLC04CD/MF4A-50CD TLC14CD/MF4A-100CD	TLC04CP/MF4A-50CP TLC14CP/MF4A-100CP
-40°C to 85°C	50:1 100:1	TLC04ID/MF4A-50ID TLC14ID/MF4A-100ID	TLC04IP/MF4A-50IP TLC14IP/MF4A-100IP
-55°C to 125°C	50:1 100:1		TLC04MP/MF4A-50MP TLC14MP/MF4A-100MP

The D package is available taped and reeled. Add the suffix R to the device type (e.g., TLC04CDR/MF4A-50CDR).

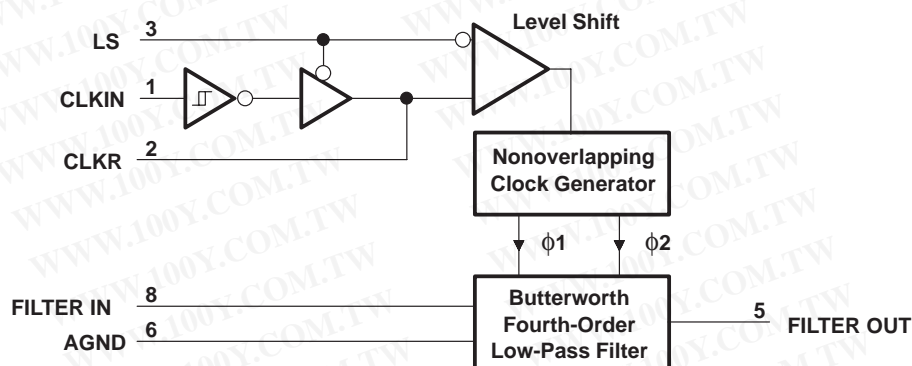

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

TLC04/MF4A-50, TLC14/MF4A-100 BUTTERWORTH FOURTH-ORDER LOW-PASS SWITCHED-CAPACITOR FILTERS

SLAS021A – NOVEMBER 1986 – REVISED MARCH 1995

functional block diagram

Terminal Functions

TERMINAL NAME	NO.	I/O	DESCRIPTION
AGND	6	I	Analog ground. The noninverting input to the operational amplifiers of the Butterworth fourth-order low-pass filter.
CLKIN	1	I	Clock in. CLKIN is the clock input terminal for CMOS-compatible clock or self-clocking options. For either option, LS is at V_{CC-} . For self-clocking, a resistor is connected between CLKIN and CLKR and a capacitor is connected from CLKIN to ground.
CLKR	2	I	Clock R. CLKR is the clock input for a TTL-compatible clock. For a TTL clock, LS is connected to midsupply and CLKIN can be left open, but it is recommended that it be connected to either V_{CC+} or V_{CC-} .
FILTER IN	8	I	Filter input
FILTER OUT	5	O	Butterworth fourth-order low-pass filter output
LS	3	I	Level shift. LS accommodates the various input clocking options. For CMOS-compatible clocks or self-clocking, LS is at V_{CC-} and for TTL-compatible clocks, LS is at midsupply.
V_{CC+}	7	I	Positive supply voltage terminal
V_{CC-}	4	I	Negative supply voltage terminal

absolute maximum ratings over operating free-air temperature range (unless otherwise noted)†

Supply voltage range, $V_{CC\pm}$ (see Note 1)	± 7 V
Operating free-air temperature range, T_A :	TLC04C/MF4A-50C, TLC14C/MF4A-100C 0°C to 70°C
	TLC04I/MF4A-50I, TLC14I/MF4A-100I -40°C to 85°C
	TLC04M/MF4A-50M, TLC14M/MF4A-100M	... -55°C to 125°C
Storage temperature range, T_{stg}	-65°C to 150°C
Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds	260°C

† Stresses beyond those listed under “absolute maximum ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under “recommended operating conditions” is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTE 1: All voltage values are with respect to the AGND terminal.

recommended operating conditions

		TLC04/MF4A-50		TLC14/MF4A-100		UNIT	
		MIN	MAX	MIN	MAX		
Positive supply voltage, V_{CC+}		2.25	6	2.25	6	V	
Negative supply voltage, V_{CC-}		-2.25	-6	-2.25	-6	V	
High-level input voltage, V_{IH}		2		2		V	
Low-level input voltage, V_{IL}		0.8		0.8		V	
Clock frequency, f_{clock} (see Note 2)	$V_{CC\pm} = \pm 2.5$ V	5	1.5×10^6	5	1.5×10^6	Hz	
	$V_{CC\pm} = \pm 5$ V	5	2×10^6	5	2×10^6		
Cutoff frequency, f_{CO} (see Note 3)		0.1	40×10^3	0.05	20×10^3	Hz	
Operating free-air temperature, T_A	TLC04C/MF4A-50C, TLC14C/MF4A-100C		0	70	0	70	°C
	TLC04I/MF4A-50I, TLC14I/MF4A-100I		-40	85	-40	85	
	TLC04M/MF4A-50M, TLC14M/MF4A-100M		-55	125	-55	125	

NOTES: 2. Above 250 kHz, the input clock duty cycle should be 50% to allow the operational amplifiers the maximum time to settle while processing analog samples.

3. The cutoff frequency is defined as the frequency where the response is 3.01 dB less than the dc gain of the filter.

electrical characteristics over recommended operating free-air temperature range, $V_{CC+} = 2.5$ V, $V_{CC-} = -2.5$ V, $f_{clock} \leq 250$ kHz (unless otherwise noted)

filter section

PARAMETER		TEST CONDITIONS	TLC04/MF4A-50			TLC14/MF4A-100			UNIT
			MIN	TYP‡	MAX	MIN	TYP‡	MAX	
V_{OO}	Output offset voltage		25			50			mV
V_{OM}	Peak output voltage	$R_L = 10$ k Ω	V_{OM+}	1.8	2	1.8	2	V	
			V_{OM-}	-1.25	-1.7	-1.25	-1.7		
I_{OS}	Short-circuit output current	$T_A = 25^\circ\text{C}$, See Note 4	Source	-0.5			-0.5	mA	
			Sink	4			4		
I_{CC}	Supply current	$f_{clock} = 250$ kHz	1.2	2.25	1.2	2.25	mA		

‡ All typical values are at $T_A = 25^\circ\text{C}$.

NOTE 4: $I_{OS(source)}$ is measured by forcing the output to its maximum positive voltage and then shorting the output to the V_{CC-} terminal. $I_{OS(sink)}$ is measured by forcing the output to its maximum negative voltage and then shorting the output to the V_{CC+} terminal.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
