Precautions for Soldering GA1A1S202WP

1. In case, solder reflow

Please do two times or less soldering at the temperature and the time within the temperature profile as shown in the figure below.

2. Other precautions

An infrared lamp used to heat up for soldering may cause a localized temperature rise in the resin.

So keep the package temperature within that specified in Item 1.

Please be careful not to give the mechanical force to the package when soldering because it may cause the deformation or defect due to the plated connection.

Even if within the temperature profile above, there is the possibility that the gold wire in package is broken in case that the deformation of PCB gives the affection to terminals.

Please use after confirming the conditions fully by actual solder reflow machine.

3. Storage and management after opening the package

3.1 Storage condition : Storage shall be in accordance with the below conditions.

Storage temp. : 5 to 30°C

Storage humidity : 70%RH or less

3.2 Treatment after opening the package

(1) After opening the package, please mount at the conditions of humidity 60%RH or less and temperature 5 to 25°C within 3 days.

(2) In case of long time storage after opening the package, please mount within 2 weeks at the conditions of (A) or (B).

(A) after resealing with desiccant in moisture-proof sack by sealer, keeping in the condition of humidity 70%RH or less and temperature 5 to 30°C

(B) keeping in the dry box (humidity 20% or less, temperature 5 to 25°C)

3.3 Baking before mounting

In case that it could not be carried out the above treatment, or the humidity indicator card turned pink when opening the package, it is able to mount by baking treatment. However baking treatment shall be limited only 1 time.

Recommended conditions : 125°C, 16 to 24 hours

Recommended conditions at the packaged condition by the reel : 65°C, 48 hours

※ In the case baking at the packaged condition, please hang the reel in the oven using the spindle through the center hall of the reel. Please do not put the reel across the oven.
