Features and benefits

FN 2010 filters are designed for easy and fast chassis mounting

FN 2010 filters are also available as B versions without Y-capacitors for medical applications as well as A version with low capacitance for safety critical applications with necessity for low leakage currents

All filters provide a general purpose conducted attenuation performance, based on chokes with high saturation resistance and excellent thermal behavior

FN 2010 filters can be used to cover a broad range of usage and they offer a good size/ampereage ratio

FN 2010 filters are also available as two-stage filters (FN 2060, FN 2070 series) for more noisy environment

Various terminal options allow you to select the desired connection style
