

EH Miniature Lighted Pushbutton Switch

Only 22.5mm depth behind panel with built-in resistor

Bright and Variable Illumination makes easy planning of multiple design.

FEATURES

- Depth behind panel : Only 22.5mm
- LED Full-Face, Split-Face, Dual-Color, Spot Illumination available.
- Hi-Bright LED Super Blue, Super White, Super Green added to Red, Green, Yellow.
- Built-in resistor for 5V,12V,24V use.
- Light Cartridge is removable from front panel.
- Button Size : 14.2mm square type, 14.2×20.4mm rectangular type
- Precision-snap action switch movement with coil spring assures long life and outstanding tactile feedback.
- Silver Contact(Gold-Plated) and W/E Alloy #1 Cross-bar Contact provided.
- Accessories: Barriers, Guard Covers, Sockets, etc.

SPECIFICATIONS

Contact	Silver Contact (Gold-Plated)	W/E Alloy #1 Cross-bar Contact
Electrical Rating	AC125V,250V 3A(Resistive)	AC125V 0.1A, DC30V 0.1A(Resistive)
Insulation Resistance	More than 100MΩ at 500V DC

ASSEMBLY & DISASSEMBLY

1. Removing Light Cartridge

Hang the cartridge with hooking fingernails in the groove, and pull out.

2. Removing Button

Hook fingernails at A and gently release the clip, and release another side as well.

3. Fitting Divider (Split-Face)

Fit divider on the groove accordingly.

4. Fitting Filter(s)

Set Filter(s) as shown onto cartridge carefully, then put button on.

5. Fitting Button

Fit the button as shown until click.

6. Fitting Light Cartridge

Insert Light Cartridge into Housing with right direction and push in until click.

ASSEMBLY & DISASSEMBLY

9. Installing Barriers (Independent)

Install Side Barriers with Switch as shown.

● Installing Barriers (Serial)

Install Side Barriers with Switch and install Center Barrier between Switches.

10. Installing Dustproof Cover

Put the switch through the Frame of cover and mount on panel. And then, install transparent cap with fitting projection and groove of frame.

11. Fitting Socket

Insert Switch into Socket with right direction (MULON mark of switch and socket should be same side) and push until stop.

12. Installing Guard Cover

Independent mounting (Fig. 1)

Fit side barriers, cover and switch as shown and mount together.

Fit side barriers and switches and mount on panel, and install center barriers, finally install covers with extending barriers' head. (Fig.2)

Fig.1

Fig.2

13. LED voltage supply rating

DC voltage supply rating for LED is shown on the side of Light Cartridge.

14. Matrix Fitting Frame

Install switches with frame and mount on panel as shown.

● NOTES

1) In case of Split-Face, LED and Filter color location should be specified as follow:

- In case of Split-Face, button color should be C (clear).
- In case of Dual-Color, button should be C (clear) with Milk-White filter or Milk-White button.
- Dimple Button type is only clear color. Therefore, button color should be C (clear).
- Please be noted that the color of "Yellow" for LED Button Filter is actually "Orange Yellow" not Lemon Yellow.
- If you purchase a wire harness (EH-3250-1 or EH-3520-2) separately, please specify the ordering code at the end of 0760 (without connector).

Notes for Split-Face and Dual-Color Illumination type

In case of using Split-Face & Dual-Color, sometimes built-in resistor type cannot be used because of heating. Please note followings:

① Split-Face

- 5V use : Select 1 (5V built-in resistor). Simultaneous lighting is possible.
- 12V use : Select 2 (12V built-in resistor). However in case of simultaneous lighting, please select 4 (non resistor) and apply external resistor 510 Ω 1/4W in series or use socket (EH-3210-2A)
- 24V use : Either do or not do simultaneous lighting, cannot select 3 (24V built-in resistor). Please select 4 (non resistor) and apply external resistor 1.3kΩ 1/2W in series or use socket (EH-3210-2B). Simultaneous lighting is possible for both way.
In 5V, 12V, 24V Split-Face non resistor type, they are the same circuits actually, however please select 4 (Split-Face non resistor) for our convenience.

② Dual Color

- It is impossible to do simultaneous lighting with all 5V,12V,24V. In case of simultaneous lighting, please select 4,5,6 respectively and apply external resistor 36Ω 1/4W, 270Ω 1/4W, 1.1kΩ 1/2W in series or use socket (EH-3210-2C),(EH-3210-2D)(EH-3210-2E) respectively.
In 5V, 12V, 24V Dual-Color non resistor type, the circuit is different. Even a case of "simultaneous lighting impossible", it is all right for couple of minutes.

1) In case of Split-Face, LED and Filter color location should be specified as follow:

- In case of Split-Face, button color should be C (clear).
- In case of Dual-Color, button should be C (clear) with Milk-White filter or Milk-White button.
- Dimple Button type is only clear color. Therefore, button color should be C (clear).
- Please be noted that the color of "Yellow" for LED Button Filter is actually "Orange Yellow" not Lemon Yellow.

Notes for Split-Face and Dual-Color Illumination type

In case of using Split-Face & Dual-Color, sometimes built-in resistor type cannot be used because of heating. Please note followings:

① Split-Face

- 5V use : Select 1 (5V built-in resistor). Simultaneous lighting is possible.
- 12V use : Select 2 (12V built-in resistor). However in case of simultaneous lighting, please select 4 (non resistor) and apply external resistor 510 Ω 1/4W in series or use socket (EH-3210-2A)
- 24V use : Either do or not do simultaneous lighting, cannot select 3 (24V built-in resistor). Please select 4 (non resistor) and apply external resistor 1.3kΩ 1/2W in series or use socket (EH-3210-2B). Simultaneous lighting is possible for both way.
In 5V, 12V, 24V Split-Face non resistor type, they are the same circuits actually, however please select 4 (Split-Face non resistor) for our convenience.

② Dual Color

- It is impossible to do simultaneous lighting with all 5V,12V,24V. In case of simultaneous lighting, please select 4,5,6 respectively and apply external resistor 36Ω 1/4W, 270Ω 1/4W, 1.1kΩ 1/2W in series or use socket (EH-3210-2C),(EH-3210-2D)(EH-3210-2E) respectively.
In 5V, 12V, 24V Dual-Color non resistor type, the circuit is different. Even a case of "simultaneous lighting impossible", it is all right for couple of minutes.
