Product Information

General Purpose Dust Remover is a high purity electronics-grade cleaner that delivers a dry blast of inert gas to hard to reach surfaces. Use to remove dust, particles, and moisture from any surface.

Clean hard-to-reach areas like keyboards or pin connectors. Use to quickly pre-clean surfaces by removing layers of loose grime and dust before using a solvent cleaner. Also, use to remove slow-drying solvents from under surface mount components or on circuit boards, connectors or optics. There are literally hundreds of uses.

Available in a variety of sizes and spray velocities to fit any cleaning need. The trigger spray allows easy single-handed operation. Plastic-safe, nonflammable and leaves no residue.
