

Engraving device GE 70

A practical accessory for the MICRO miller MF70. For engraving letters and numbers in metal or plastic. For name plates, jewellery or valuable materials. It is also equally easy to manufacture miniature, individual shapes, engravings, cut-outs and outline shapes, even in series, using self-made templates or commercially available templates (plants, animals, coats of arms).

To be fitted in place of the compound table for engraving. The lettering to be milled is scaled down during transfer. The transfer ratio can be fixed at 2:1, 3:1, 4:1 or 5:1 by simply adjusting two screws. Guide bar (template holder) holds a maximum of 14 letters. Complete with two sets of letters from A to Z, full stop and hyphen (total 52 items), two sets of numbers from 0 to 9 (20 items), fixing screws for the MF 70 base and a comprehensive instruction manual.

NO 27 102

Solid carbide stylus for extremely hard materials

Ideal for use with engraving device GE 70. For machining steel, cast steel, non-ferrous metals, plastics, glass, stoneware and tiles. Nose angle 60° for high stability. Shaft diameter 3.2mm. Not suitable for freehand work.

Scribing stylus

For forming thin lines and engraving fine-lined letters. Also for scribing printed circuit boards for later breaking out.

NO 28 764

Engraving stylus

For V-shaped letters. Letter width at base 0.5mm.

NO 28 765
