Fluke 80T-IR Non-Contact Temperature Probe

- Instantly measures temperature from -18°C to 260°C (0 to 500°F) without contact.
- Highly repeatable readings.
- Senses and converts infrared energy emitted from an object into a signal readable on a DMM.
- Results displayed in °C or °F: 1 mV dc per °C or °F output.
- Automatic shut-off after 10 minutes of operation saves battery life.
- Ideal for maintenance applications where object to be measured is hazardous to touch, is moving, easily contaminated, or difficult to reach.
