

SL-series solid state input relay

- Plug-in input relay for 24 VDC voltage
- 50 mA maximum load current
- 0...60 VDC load voltage
- Switches up to 1 kHz signals
- · Works without logic supply (4 pole)
- For PLC input signal conditioning
- Immune to disturbances on signal lines
- Shielded signal cabling not required
- cULus tested (UL and CSA)
- CE (EMC and LVD tested)
- Integrated status LED

Block diagram

Specifications (at temperature of 25 °C)

Primary			Secondary			
Input voltage	nominal	24 VDC	Load voltage	minimum	0 VDC	
Input current	typical	6 mA		maximum	60 VDC	
at nominal voltage	maximum	7 mA	Load current	maximum	50 mA	
Input voltage	minimum	18 VDC	Voltage drop at max. load	typical	0,2 V	
range (abs.)	maximum	32 VDC		maximum	0,4 V	
Input impedance	typical	$4 k\Omega$	Switch-on delay	typical	0,3 ms	
Switch-on voltage	typical	16 VDC		maximum	0,5 ms	
	maximum	18 VDC	Switch-off delay	typical	0,3 ms	
Switch-off voltage	typical	14 VDC		maximum	0,5 ms	
	minimum	12 VDC				

Physical dimensions and other data

Dimensions in mm.

Temperature limitations

There are no limitation needs for this relay.

Temperature range:

Storage: -40 °C...+70 °C Operation: -25 °C...+70 °C 勝 特 力 材 料 886-3-5753170 胜特力电子(上海) 86-21-54151736 胜特力电子(深圳) 86-755-83298787 Http://www.100y.com.tw

Derating when switching inductive loads

This relay is ment for PLC inputs and similar loads. A clamp diode must be used when swiching inductive loads.

Fusing

To protect relay against short circuit and overload a fast fuse with the correct rating for the load and the capacity of the relay should be chosen, for instance from the Wickman 193 range. Note that when overload current is not large it is possible that the fuse will not protect the relay because of the tolerance on the fuse rating.

Approvals

c UL-file E 162828

((

The relay fulfils EMC-directive 89/336/EEC requirements. Product has been tested according generic standards EN50081-2 and EN50082-2. The relay fulfils also requirements of the low voltage directive 73/23/EEC.

Guarantee

The solid state I/O relays and accessories made by Delcon Oy are guaranteed free from design and manufacturing defects for a period of three years from the shipping date. For electromechanical relays the guarantee is one year. The guarantee liability is limited to replacement of defective material and related shipping charges. Defective products must be returned to the factory for evaluation. This guarantee does not cover damage due to incorrect use or electrical overload.
