

WAVE plus

The large, rectangular viewing area of the glass lens enables comfortable viewing with both eyes. Unequalled for a large number of applications in industry, medicine and the beauty trade.

- three-dimensional magnification with light coming from the left or right and shadow-free magnification with light coming from both sides
- slim edge in front of the lens ensures that eye contact with the viewed object is not lost when switching from magnification to normal viewing and back again
- the neck joint between the head and arm moves in three planes: horizontally, vertically and laterally
- a specially coated ESD (electrostatic discharge) version is available for the electronic industry

WAVE plus has received the Good Design Awards from the Norwegian Design Council.
