- Meet or Exceed the Requirements of ANSI EIA/TIA-232-E and ITU Recommendation V.28
- **Designed to Be Interchangeable With** Motorola MC1488
- **Current-Limited Output: 10 mA Typical**
- Power-Off Output Impedance: 300 Ω Minimum
- Slew Rate Control by Load Capacitor
- **Flexible Supply Voltage Range**
- Input Compatible With Most TTL Circuits

description

The MC1488, SN55188, and SN75188 are monolithic guadruple line drivers designed to interface data terminal equipment with data communications equipment in conformance with ANSI EIA/TIA-232-E using a diode in series with each supply-voltage terminal as shown under typical applications.

The SN55188 is characterized for operation over the full military temperature range of -55°C to 125°C. The MC1488 and SN75188 are characterized for operation from 0°C to 70°C.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

PRODUCTION DATA information is current as of publication date. Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

SLLS094B - SEPTEMBER 1983 - REVISED MAY 1995

logic symbol[†]

[†] This symbol is in accordance with ANSI/IEEE Std 91-1984 and IEC Publication 617-12.

Pin numbers shown are for the D and N packages.

† Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTES: 1. All voltage values are with respect to the network ground terminal.

2. For operation above 25°C free-air temperature, refer to the maximum supply voltage curve, Figure 6. In the FK and J packages, SN55188 chips are alloy mounted.
