

Screw fuse base

Applications:

Supporters for D01-D03, D II -D III fuses of all application kinds (gG, aM, aR) in electric lines (type gG) capable of working under the heat caused by rated current and perspective short-circuit impacting current up to 50KA.

Rated insulate voltage up to 1140V

Working frequency 50Hz AC

Rated current 200A

Compliant to GB13539.1, GB13539.3, GB13539.5 and IEC269-1, IEC269-3

Design Features:

This series of fuse bases are made up with fuse carrier and its supporter. Insert the fuse into the carrier, which will be screwed into the supporter to form a complete screw fuse unit. There is a transparent glass window at the top of the fuse carrier, through which the status of the fuse can be easily observed. It can be screw installed or rail installed.

Basic Data:

It can be screw installed or rail installed. (Figures 10.1--10.8)
