

## Precision 500 mA regulators

### Features

- Output current to 0.5 A
- Output voltages of 5; 6; 8; 9; 10; 12; 15; 18; 24 V
- Thermal overload protection
- Short circuit protection
- Output transition SOA protection
- $\pm 2\%$  Output voltage tolerance
- Guaranteed in extended temperature range

### Description

The L78MxxAB series of three-terminal positive regulators is available in TO-220 and DPAK packages and with several fixed output voltages, making it useful in a wide range of applications. These regulators can provide local on-card regulation eliminating the distribution problems associated with single point regulation. Each type employs internal current limiting, thermal shutdown and safe area protection, making it essentially indestructible. If adequate heat sinking is provided, they can deliver over 0.5 A output current. Although designed primarily as fixed voltage regulators, these devices can be used

with external components to obtain adjustable voltage and currents.

### 3 Maximum ratings

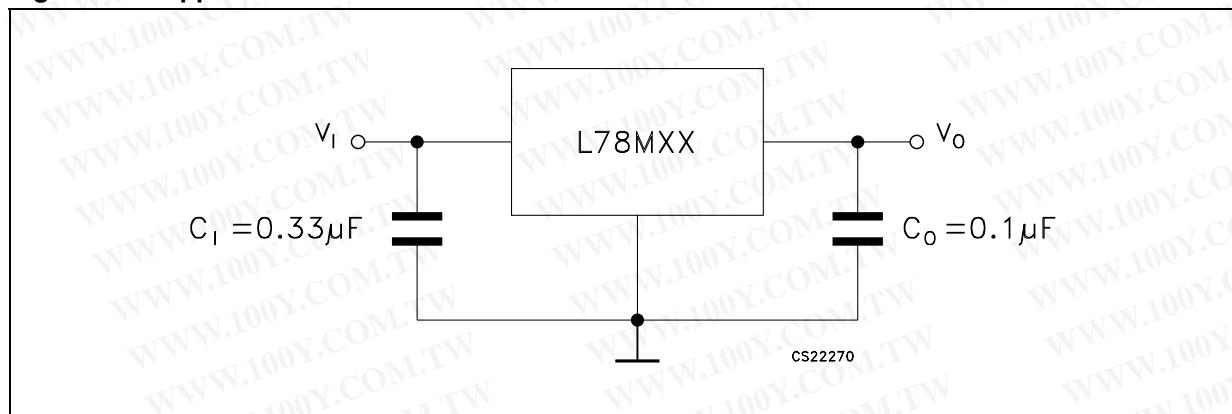

**Table 2. Absolute maximum ratings**

Symbol	Parameter	Value	Unit
$V_I$	DC input voltage	for $V_O = 5$ to 18V	35
		for $V_O = 20, 24V$	40
$I_O$	Output current	Internally limited	mA
$P_D$	Power dissipation	Internally limited	mW
$T_{STG}$	Storage temperature range	-65 to 150	°C
$T_{OP}$	Operating junction temperature range	for L78M00AC	0 to 125
		for L78M00AB	-40 to 125

*Note:* Absolute maximum ratings are those values beyond which damage to the device may occur.  
Functional operation under these condition is not implied

**Table 3. Thermal data**

Symbol	Parameter	TO-220	DPAK	Unit
$R_{thJC}$	Thermal resistance junction-case	3	8	°C/W
$R_{thJA}$	Thermal resistance junction-ambient	50	100	°C/W

## 7 Applications information

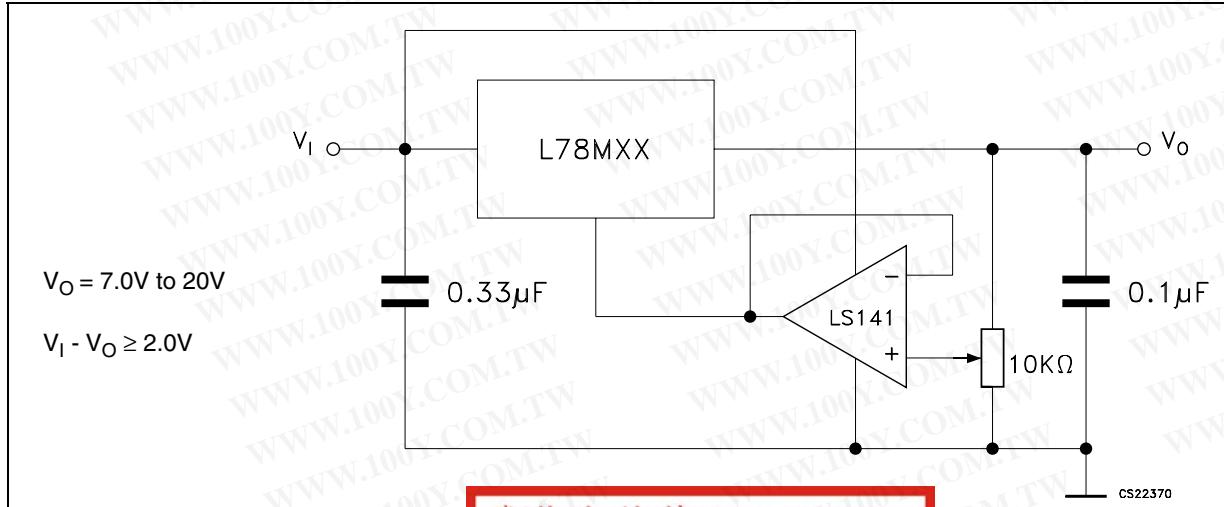

### 7.1 Design considerations

The L78MxxAB series of fixed voltage regulators are designed with thermal overload protection that shuts down the circuit when subjected to an excessive power overload condition, internal short-circuit protection that limits the maximum current the circuit will pass, and output transistor Safe-Area compensation that reduces the output short-circuit as the voltage across the pass transistor is increased. In many low current applications, compensation capacitors are not required. However, it is recommended that the regulator input be bypassed with a capacitor if the regulator is connected to the power supply filter with long wire lengths, or if the output load capacitance is large. An input bypass capacitor should be selected to provide good high-frequency characteristics to insure stable operation under all load conditions. A 0.33  $\mu$ F or larger tantalum, mylar, or other capacitor having low internal impedance at high frequencies should be chosen. The bypass capacitor should be mounted with the shortest possible leads directly across the regulators input terminals. Normally good construction techniques should be used to minimize ground loops and lead resistance drops since the regulator has no external sense lead.

**Figure 17. Current regulator**

**Figure 18. Adjustable output regulator**

[Http://www.100y.com.tw](http://www.100y.com.tw)

**Figure 19. Current boost regulator****Figure 20. Short-circuit protection**

**Note:** The circuit of [Figure 19](#) can be modified to provide supply protection against short circuits by adding a short-circuit sense resistor,  $R_{SC}$ , and an additional PNP transistor. The current sensing PNP must be able to handle the short-circuit current of the three-terminal regulator. Therefore, a four-ampere plastic power transistor is specified.

## 8 Package mechanical data

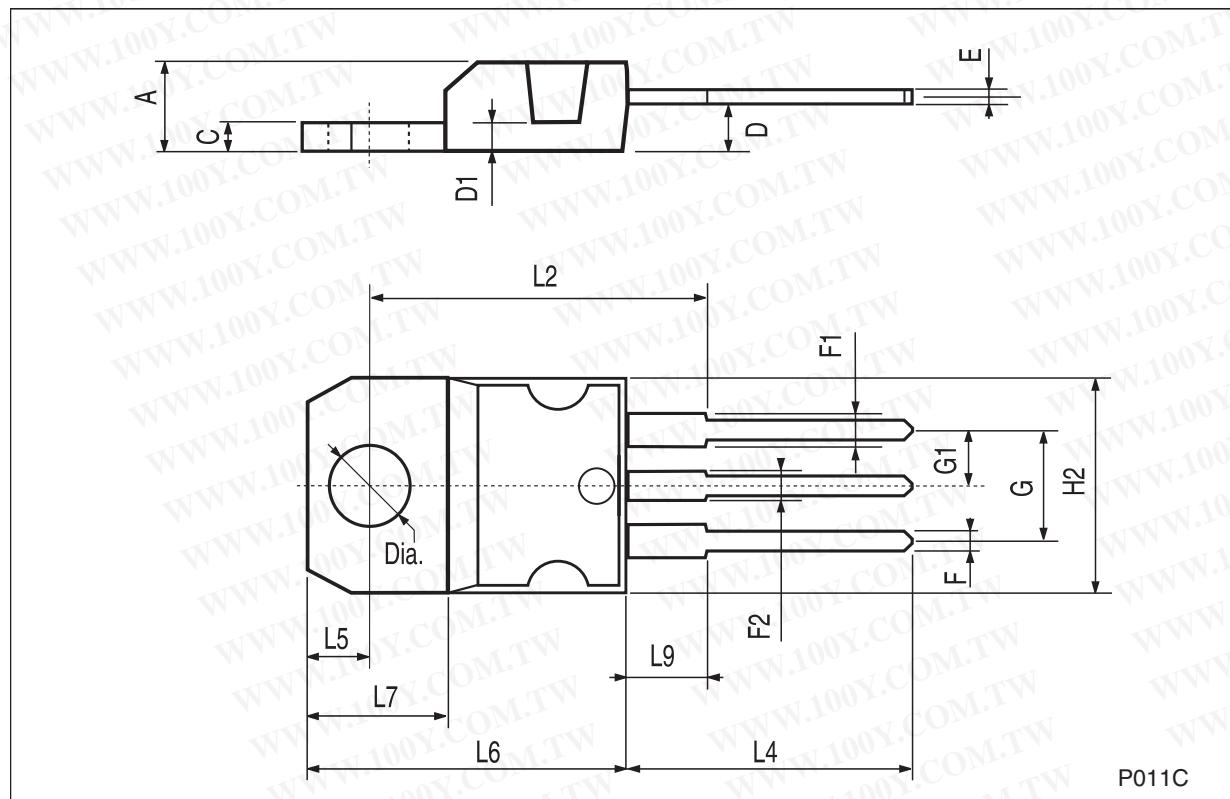

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a lead-free second level interconnect. The category of second Level Interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: [www.st.com](http://www.st.com).
