－Very Low Power Consumption
－Power Dissipation With $\pm 2$－V Supplies $170 \mu \mathrm{~W}$ Typ
－Low Input Bias and Offset Currents
－Output Short－Circuit Protection
－Low Input Offset Voltage
－Internal Frequency Compensation
－Latch－Up－Free Operation
－Popular Dual Operational Amplifier Pinout

## TLO22M IS NOT RECOMMENDED FOR NEW DESIGNS

## description

The TL022 is a dual low－power operational amplifier designed to replace higher power devices in many applications without sacrificing system performance．High input impedance，low supply currents，and low equivalent input noise voltage over a wide range of operating supply voltages result in an extremely versatile operational amplifier for use in a variety of analog applications including battery－operated circuits． Internal frequency compensation，absence of latch－up，high slew rate，and output short－circuit protection assure ease of use．
TLO22M ．．JG PACKAGE
TLO22C ．．D OR P PACKAGE （TOP VIEW）

TL022M．．．U PACKAGE （TOP VIEW）

## symbol（each amplifier）

The TL022C is characterized for operation from $0^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$ ．The $T L 022 \mathrm{M}$ is characterized for operation over the full military temperature range of $-55^{\circ} \mathrm{C}$ to $125^{\circ} \mathrm{C}$ ．

AVAILABLE OPTIONS

| $\mathrm{T}_{\mathrm{A}}$ | $V_{\text {IOmax }}$ <br> AT $25^{\circ} \mathrm{C}$ | PACKAGE |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | SMALL OUTLINE <br> （D） | CERAMIC DIP <br> （JG） | PLASTIC DIP <br> （P） | CERAMIC FLAT PACK <br> （U） |
| $0^{\circ} \mathrm{C}$ to $70^{\circ} \mathrm{C}$ | 5 mV | TL022CD | － | TL022CP | － |
| $-55^{\circ} \mathrm{C}$ to $125^{\circ} \mathrm{C}$ | 5 mV | － | TL022MJG | － | TL022MU |

The D package is available taped and reeled．Add the suffix $R$ to the device type（i．e．TL022CDR）．

## schematic

absolute maximum ratings over operating free－air temperature range（unless otherwise noted）

|  | TLO22C | TLO22M | UNIT |
| :--- | :---: | :---: | :---: |
| Supply voltage， $\mathrm{V}_{\mathrm{CC}}+($ see Note 1） | 18 | 22 | V |
| Supply voltage， $\mathrm{V}_{\mathrm{CC}}$（see Note 1） | -18 | -22 | V |
| Differential input voltage（see Note 2） | $\pm 30$ | $\pm 30$ | V |
| Input voltage（any input，see Notes 1 and 3） | $\pm 15$ | $\pm 15$ | V |
| Duration of output short circuit（see Note 4） | unlimited | unlimited |  |
| Continuous total dissipation | See Disssation Rating Table |  |  |
| Operating free－air temperature range | 0 to 70 | -55 to 125 | ${ }^{\circ} \mathrm{C}$ |
| Storage temperature range | -65 to 150 | -65 to 150 | ${ }^{\circ} \mathrm{C}$ |
| Lead temperature $1,6 \mathrm{~mm}(1 / 16$ inch）from case for 60 seconds |  | 300 | ${ }^{\circ} \mathrm{C}$ |
| Lead temperature $1,6 \mathrm{~mm}(1 / 16$ inch）from case for 10 seconds | JG or U package | D or P package | 260 |

NOTES：1．All voltage values，unless otherwise noted，are with respect to the midpoint between $\mathrm{V}_{\mathrm{CC}}+$ and $\mathrm{V}_{\mathrm{CC}}$ ．
2．Differential voltages are at $\mathrm{IN}+$ with respect to $\mathrm{IN}-$ ．
3．The magnitude of the input voltage must never exceed the magnitude of the supply voltage or 15 V ，whichever is less．
4．The output may be shorted to ground or either power supply．For the TL022M only，the unlimited duration of the short circuit applies at（or below） $125^{\circ} \mathrm{C}$ case temperature or $75^{\circ} \mathrm{C}$ free－air temperature．

## IMPORTANT NOTICE

Texas Instruments and its subsidiaries（TI）reserve the right to make changes to their products or to discontinue any product or service without notice，and advise customers to obtain the latest version of relevant information to verify，before placing orders，that information being relied on is current and complete．All products are sold subject to the terms and conditions of sale supplied at the time of order acknowledgement，including those pertaining to warranty，patent infringement，and limitation of liability．

TI warrants performance of its semiconductor products to the specifications applicable at the time of sale in accordance with Tl＇s standard warranty．Testing and other quality control techniques are utilized to the extent TI deems necessary to support this warranty．Specific testing of all parameters of each device is not necessarily performed，except those mandated by government requirements．

CERTAIN APPLICATIONS USING SEMICONDUCTOR PRODUCTS MAY INVOLVE POTENTIAL RISKS OF DEATH，PERSONAL INJURY，OR SEVERE PROPERTY OR ENVIRONMENTAL DAMAGE（＂CRITICAL APPLICATIONS＂）．TI SEMICONDUCTOR PRODUCTS ARE NOT DESIGNED，AUTHORIZED，OR WARRANTED TO BE SUITABLE FOR USE IN LIFE－SUPPORT DEVICES OR SYSTEMS OR OTHER CRITICAL APPLICATIONS．INCLUSION OF TI PRODUCTS IN SUCH APPLICATIONS IS UNDERSTOOD TO BE FULLY AT THE CUSTOMER＇S RISK．

In order to minimize risks associated with the customer＇s applications，adequate design and operating safeguards must be provided by the customer to minimize inherent or procedural hazards．

TI assumes no liability for applications assistance or customer product design．TI does not warrant or represent that any license，either express or implied，is granted under any patent right，copyright，mask work right，or other intellectual property right of TI covering or relating to any combination，machine，or process in which such semiconductor products or services might be or are used．Tl＇s publication of information regarding any third party＇s products or services does not constitute Tl＇s approval，warranty or endorsement thereof．
