

# BIPOLAR ANALOG INTEGRATED CIRCUIT

## $\mu$ PC29xxB Series

### THREE-TERMINAL LOW DROPOUT VOLTAGE REGULATOR (OUTPUT CURRENT: 1.0 A)

#### DESCRIPTION

The  $\mu$  PC29xxB series is a series of three-terminal low dropout voltage regulators with 1 A output current. This series is suitable for low voltage operated IC and has 4 output voltage types, 1.8 V, 2.5 V, 3.3 V and 5.0 V. Compared with the  $\mu$  PC29xx and  $\mu$  PC29xxA series, this series has improved output voltage tolerance ( $V_o \pm 2\%$ ), quiescent current (1.8 mA TYP. (at  $I_o = 0$  A)), and short-circuit current.

#### FEATURES

- Output current capacity: 1 A
- Output voltage tolerance:  $V_o \pm 2\%$  ( $T_A = 25^\circ C$ )
- Low quiescent current: 1.8 mA TYP. (at  $I_o = 0$  A)
- Low short-circuit current: 0.3 A TYP. ( $\mu$  PC2918B), 0.6 A TYP. ( $\mu$  PC2925B,  $\mu$  PC2933B)
- Low dropout voltage:  $V_{DIF} = 0.6$  V MAX. (at  $I_o = 0.5$  A)
- On-chip inrush current protection circuit at the time of input voltage rising (when input voltage is low)
- On-chip over-current limiter
- On-chip thermal shut down circuit

#### APPLICATIONS

Digital TV, DVD, LCD Monitors, Printers, Audio, Air Conditioners, and other applications.

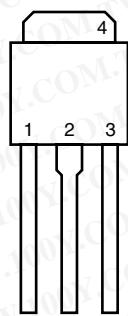

#### PIN CONFIGURATIONS (Marking Side)

Isolated TO-220 (MP-45G)      SC-64 (MP-3)

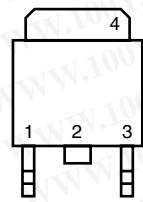

1: INPUT  
2: GND  
3: OUTPUT

SC-63 (MP-3Z)

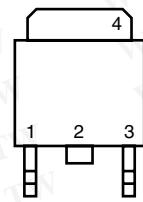

1: INPUT  
2: GND  
3: OUTPUT  
4: GND (Fin)

TO-252

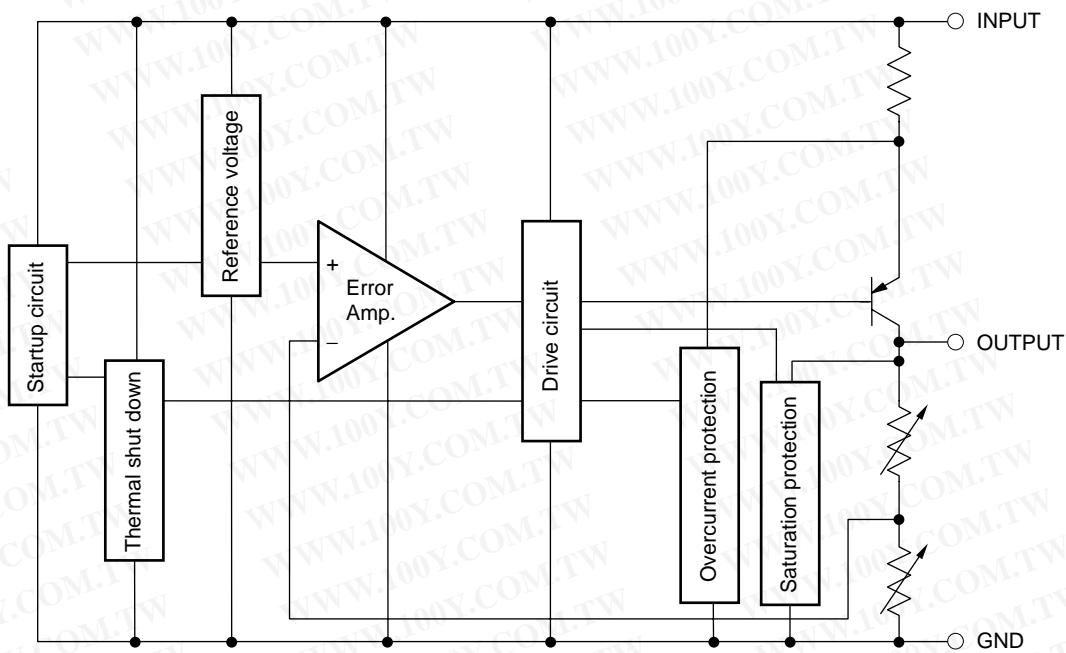

1: INPUT  
2: GND  
3: OUTPUT  
4: GND (Fin)

1: INPUT  
2: GND  
3: OUTPUT  
4: GND (Fin)

The information in this document is subject to change without notice. Before using this document, please confirm that this is the latest version.  
Not all products and/or types are available in every country. Please check with an NEC Electronics sales representative for availability and additional information.

ABSOLUTE MAXIMUM RATINGS ( $T_A = 25^\circ\text{C}$ , unless otherwise specified)

Parameter	Symbol	Rating			Unit
		$\mu\text{PC29xxBHF}$	$\mu\text{PC29xxBHB}$	$\mu\text{PC29xxBT}$	
				$\mu\text{PC29xxBT1D}$	
Input Voltage	$V_{IN}$	-0.3 to +16.0			V
Internal Power Dissipation ( $T_c = 25^\circ\text{C}$ ) <small>Note</small>	$P_T$	15	10	10	W
Operating Ambient Temperature	$T_A$	-40 to +85			°C
Operating Junction Temperature	$T_J$	-40 to +150			°C
Storage Temperature	$T_{STG}$	-55 to +150			°C
Thermal Resistance (junction to case)	$R_{th(J-C)}$	7	12.5	12.5	°C/W
Thermal Resistance (junction to ambient)	$R_{th(J-A)}$	65	125	125	°C/W

**Note** Internally limited. When the operating junction temperature rises above  $150^\circ\text{C}$ , the internal circuit shuts down the output voltage.

**Caution** Product quality may suffer if the absolute maximum rating is exceeded even momentarily for any parameter. That is, the absolute maximum ratings are rated values at which the product is on the verge of suffering physical damage, and therefore the product must be used under conditions that ensure that the absolute maximum ratings are not exceeded.

## TYPICAL CONNECTION

勝特力材料 886-3-5753170  
胜特力电子(上海) 86-21-54151736  
胜特力电子(深圳) 86-755-83298787  
[Http://www.100y.com.tw](http://www.100y.com.tw)

$C_{IN}$ : 0.1  $\mu\text{F}$  or higher. Set this value according to the length of the line between the regulator and the INPUT pin. Be sure to connect  $C_{IN}$  to prevent parasitic oscillation. Use of a film capacitor or other capacitor with first-rate voltage and temperature characteristics is recommended. If using a laminated ceramic capacitor, it is necessary to ensure that  $C_{IN}$  is 0.1  $\mu\text{F}$  or higher for the voltage and temperature range to be used.

$C_{OUT}$ : 10  $\mu\text{F}$  or higher. Be sure to connect  $C_{OUT}$  to prevent oscillation and improve excessive load regulation. Place  $C_{IN}$  and  $C_{OUT}$  as close as possible to the IC pins (within 2 cm). Also, use an electrolytic capacitor with low impedance characteristics if considering use at sub-zero temperatures.

D1: If the OUTPUT pin has a higher voltage than the INPUT pin, connect a diode.

D2: If the OUTPUT pin has a lower voltage than the GND pin, connect a Schottky barrier diode.

**Caution** Make sure that no external voltage is applied to the OUTPUT pin from external.

&lt;R&gt;

## RECOMMENDED OPERATING CONDITIONS

Parameter	Symbol	Type Number	MIN.	TYP.	MAX.	Unit
Input Voltage	$V_{IN}$	$\mu$ PC2918B	2.8		12.0	V
		$\mu$ PC2925B	3.5		12.0	V
		$\mu$ PC2933B	4.3		12.0	V
		$\mu$ PC2905B	6.0		12.0	V
Output Current	$I_o$	All	0		1.0	A
Operating Ambient Temperature	$T_A$	All	-40		+85	°C
Operating Junction Temperature	$T_J$	All	-40		+125	°C

**Caution Use of conditions exceeding the above-listed recommended operating conditions is not a problem as long as the absolute maximum ratings are not exceeded. However, since the use of such conditions diminishes the margin of safety, careful evaluation is required before such conditions are used.**

&lt;R&gt;

## ELECTRICAL CHARACTERISTICS

( $T_J = 25^\circ\text{C}$ ,  $V_{IN} = 2.8 \text{ V}$ ,  $I_o = 0.5 \text{ A}$ ,  $C_{IN} = 0.1 \mu\text{F}$ ,  $C_{OUT} = 10 \mu\text{F}$ , unless otherwise specified)

## PACKAGE DRAWINGS (Unit: mm)

 $\mu$ PC2918BHF,  $\mu$ PC2925BHF,  $\mu$ PC2933BHF,  $\mu$ PC2905BHF

## 3PIN PLASTIC SIP (MP-45G)

## NOTE

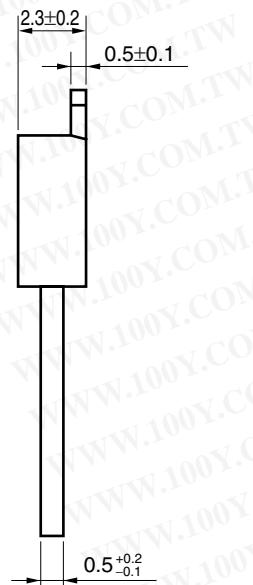

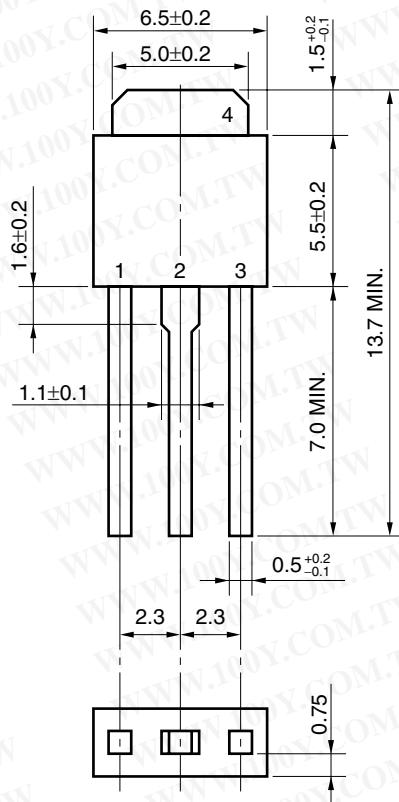

Each lead centerline is located within 0.25 mm of its true position (T.P.) at maximum material condition.

## RECOMMENDED MOUNTING CONDITIONS

The following conditions must be met for mounting conditions of the  $\mu$ PC29xxB series.

For more details, refer to the **Semiconductor Device Mount Manual**  
(<http://www.necel.com/pkg/en/mount/index.html>).

Please consult with our sales offices in case other mounting process is used, or in case the mounting is done under different conditions.

### Type of Surface Mount Device

$\mu$ PC2918BT,  $\mu$ PC2925BT,  $\mu$ PC2933BT,  $\mu$ PC2905BT: SC-63 (MP-3Z)

$\mu$ PC2918BT1D,  $\mu$ PC2925BT1D,  $\mu$ PC2933BT1D,  $\mu$ PC2905BT1D: TO-252

Process	Conditions	Symbol
Infrared Ray Reflow	Peak temperature: 235°C or below (package surface temperature), Reflow time: 30 seconds or less (at 210°C or higher), Maximum number of reflows processes: 3 times or less.	IR35-00-3
Vapor Phase Soldering	Peak temperature: 215°C or below (package surface temperature), Reflow time: 40 seconds or less (at 200°C or higher), Maximum number of reflows processes: 3 times or less.	VP15-00-3
Wave Soldering	Solder temperature: 260°C or below, Flow time: 10 seconds or less, Maximum number of flow processes: 1 time, Pre-heating temperature: 120°C or below (package surface temperature).	WS60-00-1
Partial Heating Method	Pin temperature: 300°C or below, Heat time: 3 seconds or less (per each side of the device).	P300-1

**Caution** Apply only one kind of soldering condition to a device, except for "partial heating method", or the device will be damaged by heat stress.

**Remark** Flux: Rosin-based flux with low chlorine content (chlorine 0.2 Wt% or below) is recommended.

### Type of Through-hole Device

$\mu$ PC2918BHF,  $\mu$ PC2925BHF,  $\mu$ PC2933BHF,  $\mu$ PC2905BHF: Isolated TO-220 (MP-45G)

$\mu$ PC2918BHB,  $\mu$ PC2925BHB,  $\mu$ PC2933BHB,  $\mu$ PC2905BHB: SC-64 (MP-3)

Process	Conditions	Symbol
Wave Soldering (only to leads)	Solder temperature: 260°C or below, Flow time: 10 seconds or less	WS60-00
Partial Heating Method	Pin temperature: 300°C or below, Heat time: 3 seconds or less (per each pin).	P300-1

**Caution** For through-hole device, the wave soldering process must be applied only to leads, and make sure that the package body does not get jet soldered.

**Type of Surface Mount Device (Pb-free)** $\mu$  PC2918BT-AZ,  $\mu$  PC2925BT-AZ,  $\mu$  PC2933BT-AZ,  $\mu$  PC2905BT-AZ: SC-63 (MP-3Z) $\mu$  PC2918BT1D-AT,  $\mu$  PC2925BT1D-AT,  $\mu$  PC2933BT1D-AT,  $\mu$  PC2905BT1D-AT: TO-252

Process	Conditions	Symbol
Infrared Ray Reflow	Peak temperature: 260°C or below (package surface temperature), Reflow time: 30 seconds or less (at 210°C or higher), Maximum number of reflows processes: 3 times or less.	IR60-00-3
Wave Soldering	Solder temperature: 260°C or below, Flow time: 10 seconds or less, Maximum number of flow processes: 1 time, Pre-heating temperature: 120°C or below (package surface temperature).	WS60-00-1
Partial Heating Method	Pin temperature: 350°C or below, Heat time: 3 seconds or less (per each side of the device).	P350-1

**Caution** Apply only one kind of soldering condition to a device, except for "partial heating method", or the device will be damaged by heat stress.

**Remark** Flux: Rosin-based flux with low chlorine content (chlorine 0.2 Wt% or below) is recommended.

**Type of Through-hole Device (Pb-free)** $\mu$  PC2918BHF-AZ,  $\mu$  PC2925BHF-AZ,  $\mu$  PC2933BHF-AZ,  $\mu$  PC2905BHF-AZ: Isolated TO-220 (MP-45G) $\mu$  PC2918BHB-AZ,  $\mu$  PC2925BHB-AZ,  $\mu$  PC2933BHB-AZ,  $\mu$  PC2905BHB-AZ: SC-64 (MP-3)

Process	Conditions	Symbol
Wave Soldering (only to leads)	Solder temperature: 260°C or below, Flow time: 10 seconds or less	WS60-00
Partial Heating Method	Pin temperature: 350°C or below, Heat time: 3 seconds or less (per each pin).	P350-1

**Caution** For through-hole device, the wave soldering process must be applied only to leads, and make sure that the package body does not get jet soldered.

- The information in this document is current as of December, 2005. The information is subject to change without notice. For actual design-in, refer to the latest publications of NEC Electronics data sheets or data books, etc., for the most up-to-date specifications of NEC Electronics products. Not all products and/or types are available in every country. Please check with an NEC Electronics sales representative for availability and additional information.
- No part of this document may be copied or reproduced in any form or by any means without the prior written consent of NEC Electronics. NEC Electronics assumes no responsibility for any errors that may appear in this document.
- NEC Electronics does not assume any liability for infringement of patents, copyrights or other intellectual property rights of third parties by or arising from the use of NEC Electronics products listed in this document or any other liability arising from the use of such products. No license, express, implied or otherwise, is granted under any patents, copyrights or other intellectual property rights of NEC Electronics or others.
- Descriptions of circuits, software and other related information in this document are provided for illustrative purposes in semiconductor product operation and application examples. The incorporation of these circuits, software and information in the design of a customer's equipment shall be done under the full responsibility of the customer. NEC Electronics assumes no responsibility for any losses incurred by customers or third parties arising from the use of these circuits, software and information.
- While NEC Electronics endeavors to enhance the quality, reliability and safety of NEC Electronics products, customers agree and acknowledge that the possibility of defects thereof cannot be eliminated entirely. To minimize risks of damage to property or injury (including death) to persons arising from defects in NEC Electronics products, customers must incorporate sufficient safety measures in their design, such as redundancy, fire-containment and anti-failure features.
- NEC Electronics products are classified into the following three quality grades: "Standard", "Special" and "Specific".

The "Specific" quality grade applies only to NEC Electronics products developed based on a customer-designated "quality assurance program" for a specific application. The recommended applications of an NEC Electronics product depend on its quality grade, as indicated below. Customers must check the quality grade of each NEC Electronics product before using it in a particular application.

"Standard": Computers, office equipment, communications equipment, test and measurement equipment, audio and visual equipment, home electronic appliances, machine tools, personal electronic equipment and industrial robots.

"Special": Transportation equipment (automobiles, trains, ships, etc.), traffic control systems, anti-disaster systems, anti-crime systems, safety equipment and medical equipment (not specifically designed for life support).

"Specific": Aircraft, aerospace equipment, submersible repeaters, nuclear reactor control systems, life support systems and medical equipment for life support, etc.

The quality grade of NEC Electronics products is "Standard" unless otherwise expressly specified in NEC Electronics data sheets or data books, etc. If customers wish to use NEC Electronics products in applications not intended by NEC Electronics, they must contact an NEC Electronics sales representative in advance to determine NEC Electronics' willingness to support a given application.

(Note)

- (1) "NEC Electronics" as used in this statement means NEC Electronics Corporation and also includes its majority-owned subsidiaries.
- (2) "NEC Electronics products" means any product developed or manufactured by or for NEC Electronics (as defined above).
